---

**Product Designer with 3+ years of full-time experience in EdTech and early-stage products.** I turn research findings into user flows, prototypes, and shipped features, working closely with developers and stakeholders. My experience includes qualitative and quantitative research, usability testing, AI-enabled product features, and design systems.

## EXPERIENCE

### CO Koalitsiya | Product Designer

Mar 2023 – Present | Moscow | Full-time

- Conducted teacher interviews and identified key friction in publishing video lessons: reliance on third-party services, manual timecodes, and missing lesson summaries.
- Designed an end-to-end MP4 upload and AI processing flow in the lesson editor, including transcription, timecodes, and summaries; reduced time to publish by 40%, increased teacher CSAT by 18%, and reached 64% adoption of the AI feature.
- Redesigned teacher and student dashboards, designed an AI tutor for test generation, and maintained Figma components, variants, and variables with developers through delivery.

### GPtest | Independent Product Designer

Mar 2026 – Present | Product in production

- Ran a survey in student communities with 127 responses in two weeks, validating the problem: 59% used ChatGPT and 40% lacked explanations for errors.
- Launched an MVP to 20 users, collected daily feedback for two weeks, and iterated through usability testing with four users.
- Improved the testing flow with progress analytics, accidental-close protection, clearer labels, file names, and a generation loading state.

## SELECTED PROJECTS

### Mappy | Independent Product Designer

Jul 2025 – Sep 2025 | Product launched to production

- Built a geo-service for saving places: surveyed 57 respondents, formulated four core scenario hypotheses, validated them in two rounds of hallway testing, and created the UI kit and iterative product layouts.

## EDUCATION

### International Banking Institute named after Anatoliy Sobchak

Bachelor's degree in Business Informatics, expected 2029 | Online programme, part-time

## LANGUAGES

Russian — Native | English — B2 (Upper-Intermediate)
