SUMMARY

Product designer with 3+ years of experience in EdTech and startups. I conduct research from surveys to interviews, design solutions, and validate hypotheses through testing. I develop product thinking through my own projects — I launched 2 personal products alongside my main job.

SKILLS

ui, miro, figma, custdev, customer journey mapping, onboarding, neural networks, claude, chatgpt, spline, a/b testing, user flow, product design, design systems, interviews, figjam, collaboration with development, prototyping, minimal viable product, user interface, user experience, usability, material design, english

EXPERIENCE

GPtest

Mar 2026 — Present

Product Designer

- Created a survey in student chats: 127 responses in 2 weeks → confirmed the problem (59% use ChatGPT, 40% lack explanations for errors)
- Launched an MVP with 20 users, collected daily feedback for 2 weeks → identified technical bugs and UX interface issues
- Conducted a 2nd iteration with 4 users: the flow is clear to everyone → refined button labels and added names for uploaded files
- Improved the interface based on feedback: added progress analytics, a warning for accidental test closure, and a loading indicator during generation

CO Koalitsiya

Moscow | Mar 2022 — Present

Product Designer

- Conducted interviews with teachers: identified 3 key pain points when publishing video lessons — long path through a third-party service, manual timecodes, lack of summaries
- Designed a unified flow for MP4 upload + AI transcription + timecodes directly in the lesson editor → TTP -40%, CSAT +18%, AI adoption 64%
- Redesigned the student and teacher dashboards
- Developed an AI tutor for generating tests from scratch
- Worked with the design system: built components/variants and variables in Figma

PROJECTS

Mappy

Jul 2025 — Sep 2025

Product Designer

Geo-service for saving interesting places. Launched into production independently, the service is in active development.

- Collected a survey from 57 respondents → formulated 4 hypotheses about key scenarios
- Validated hypotheses through 2 iterations of hallway testing
- Developed a UI kit and layouts for each iteration

EDUCATION

Mezhdunarodnyy bankovskiy institut imeni Anatoliya Sobchaka

Saint Petersburg | Jan 2025 — Jan 2029

Information Technology in Business, Business Informatics
